

MARINA VIDAKI, Ph.D.

PERSONAL INFORMATION

Name: Marina
Surname: Vidaki
Nationality: Greek
Current address: University of Crete, Faculty of Medicine, Division of Basic Sciences, Voutes, Heraklion
Crete, Greece
e-mail: marina.vidaki@uoc.gr ; marina_vidaki@imbb.forth.gr
Google Scholar: <https://scholar.google.com/citations?user=Dim-FS8AAAAJ&hl=en>
Website: <https://www.vidakilab.com/>

CURRENT POSITION

University of Crete, Faculty of Medicine & IMBB-FORTH, Heraklion, Greece

2019-current: Assistant Professor of Cellular-Molecular Biology, Principal Investigator

Research Direction: Cellular/Molecular Neuroscience, Mechanisms of Axon Development and Regeneration

RESEARCH INTEREST

The main goal of my research is to understand how neuronal connectivity in the nervous system (NS) is established and repaired. To this end, my lab studies axon growth and guidance, both during development and regeneration, focusing on mechanisms of local mRNA translation. Defective local mRNA translation is implicated in numerous neurodevelopmental disorders, as well as in the diminished capacity of the adult central NS (CNS) to regenerate. We study local molecular components and regulation of translation in developing and adult CNS and peripheral NS (PNS) axons, their dynamic alterations during guidance and regeneration, and whether they can be manipulated to regulate axonal behavior

RESEARCH POSITIONS

Massachusetts Institute of Technology, Cambridge, USA

2015-2019: Research Scientist

Role of cytoskeleton-associated proteins in mRNA biology and localized protein synthesis during neuronal development.

(Laboratory of Prof. F. Gertler).

2010-2015: Postdoctoral Associate

Cellular and Molecular mechanisms of axon guidance and neuronal development.

(Laboratory of Prof. F. Gertler)

EDUCATION

University of Crete, Heraklion, Crete, Greece

2005-2010: PhD in Developmental Neuroscience, Faculty of Medicine

“Intracellular & extracellular signals in the development of GABAergic interneurons”.

- Scientific supervisor: Prof. Domna Karagogeos
- 2003-2005:** **MSc in Molecular Biology & Biomedicine**, Department of Biology & Faculty of Medicine
 “Expression pattern of the maternally imprinted gene *Gtl2* in the forebrain, during embryonic development and adulthood”.
- Scientific supervisor: Prof. Domna Karagogeos
- 1999-2003:** **BSc in Biology**, Department of Biology
 “Phenotypic analysis of the cerebellum of TAG-1 *-/-* mice, during postnatal development and adulthood”.
- Scientific supervisor: Prof. Domna Karagogeos

Languages

- Greek:** Native speaker
- English:** Fluent (Cambridge Proficiency in English/Teaching permit)
- German:** Basic (Goethe Zertificat A1)

INVITED TALKS

- 2019:** National Meeting of the Hellenic Society for Neuroscience, Heraklion, Greece
- 2018:** Centre for Psychiatry and Neuroscience (CPN), Université Paris Descartes, Paris, France
- 2018:** Hertie Institute for Clinical Brain Research, University of Tübingen, Tübingen, Germany
- 2018:** European Molecular Biology Laboratory (EMBL), Rome, Italy
- 2017:** American Society for Cell Biology, ASCB/EMBO Meeting, Philadelphia, PA, USA
- 2017:** Neuroscience Center (HiLife), University of Helsinki, Helsinki, Finland
- 2016:** The D. Koch Institute for Integrative Cancer Research at MIT, Cambridge, MA, USA
- 2016:** Institute of Molecular Biology and Biotechnology-FORTH, Heraklion, Greece
- 2013:** International Society for Neurochemistry Meeting, Chania, Greece
- 2013:** The Picower Institute Brain Lectures, MIT, Cambridge, MA, USA
- 2008:** National Meeting of the Hellenic Society for Neuroscience, Athens, Greece

PATENT APPLICATIONS

- **Vidaki M** and Gertler FB, “Methods of modulating protein expression from the Mena-ribonucleoprotein complex in cells”, filed June 21, 2017, U.S. Provisional Pat. Ser. No. 1515028_109USO

VISITING RESEARCHER

- 2008:** Visiting EMBO Fellow at the Laboratory of Dr. N. Kessarar, Wolfson Institute for Biomedical Research, University College London, UK. Construction of *Tag1*^{loxP-GFP-loxP-DTA} transgenic mouse line (Bastakis et al, 2015; Kastrieti et al, *in prep*)
- 2007:** Visiting scientist at the Laboratory of Dr. N. Kessarar, Wolfson Institute for Biomedical Research, University College London, UK. Construction of *Tag1*^{Cre} transgenic mouse line (Schmidt et al, 2014)
- 2005:** Visiting trainee at the Laboratory of Prof. O. Marin, Instituto de Neurociencias de Alicante, Alicante, Spain. Training on Neuronal transplants, Organotypic brain slices, Slice Electroporation, 2D- and 3D-primary cortical neuron cultures

FUNDING

- **2018-2021: Hellenic Foundation of Research and Innovation (EΛIΔEK)**
“Local Translation during Axonal Development and Regeneration”, proposal ID# 2343 (€180000)

FELLOWSHIPS / AWARDS

- 2013:** International Society for Neurochemistry, travel award for the ISN & FENS School on “Local Protein Synthesis in Axons and Dendrites”, Kolymbari, Crete, Greece
- 2009:** Hellenic Society for Neuroscience Fellowship for summer school on Neuroglial interactions: From womb to tomb in health and disease, Izmir, Turkey
- 2008:** Manasakis Graduate Fellowship of the University of Crete
- 2008:** EMBO (European Molecular Biology Laboratory) Short Term Fellowship at the laboratory of Dr. N. Kessaris, Wolfson Institute for Biomedical Research, University College London, UK
- 2006:** Best Poster Presentation Award, 20th National Conference of the Hellenic Society for Neuroscience, Heraklion, Crete, Greece

TEACHING EXPERIENCE

- **2019-current:** Ass Prof University of Crete, Medical School,
Undergraduate courses: Biology A (1st Semester)
Graduate program: Molecular Biology-Biomedicine, University of Crete & IMBB-FORTH
Graduate program: Neurosciences, University of Crete & IMBB-FORTH
- **2017:** Kaufman Teaching Certificate Program (KTCP) at MIT
- Mentoring MSc, Graduate and Rotation Students and supervising technicians
2010-2018: During my postdoc I supervised 1 Research Assistant and mentored 2 PhD students, 2 rotating students, and 1 visiting student (designing experiments, teaching techniques, editing theses and manuscripts)
2005-2010: During my PhD, I supervised 5 MSc students and 1 undergraduate student (teaching techniques, designing experiments, suggesting and discussing literature, editing theses)
- **2005:** Instructor of Laser Scanning Confocal Microscopy, seminars for “Modern Light Microscopy Techniques in Biomedical Research”, University of Crete
- **2004:** Teaching Assistant, Microbiology and Molecular Biology laboratory course, University of Crete (preparation and instruction of laboratory courses for 2nd year Biology undergraduate students)
